

# wrapped profiles

Morland offer a broad range of decorative finishes on a variety of substrates to deliver a sophisticated solution in achieving a co-ordinated fit-out.

For example, the same finish can be applied to MDF, aluminium and plastic to allow clients to combine substrates depending upon the application of the profile.

If it is simply no knots or warping, then MDF is appropriate. Less weight can be achieved with poplar, obeche or plastic. Greater rigidity comes from aluminium. Polycarbonate is useful where heat resistance is a requirement.

Not only can the substrate be selected according to the application, but so can the decorative finish. From plain paper to more durable lacquered foils and on to high gloss vinyl, the finish can be tailored to suit the purpose.

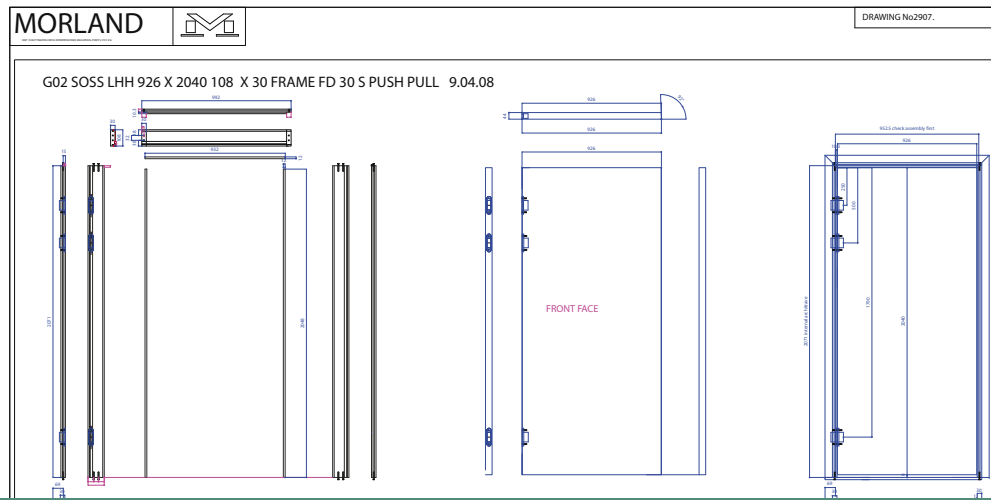

Morland have an extensive inventory of foils that are available for small orders. For larger needs, we can either hold stock on a free issue basis or buy from your nominated supplier. We work with all the leading foil suppliers and co-ordinate lead times to ensure 100% order fulfillment.

This range of finishes and substrates, but with one point of control allows a co-ordinated fit out. Where the materials used are fit for purpose to give a long lasting finish.

## CAD Drawings

Our technical department can take a rough sketch to produce a fully detailed CAD drawing for approval prior to manufacture. Once approved that drawing becomes integral to the manufacturing process and is embedded within the work order.

## Profile Materials

- ✓ Aluminium
- ✓ MDF/ULDF
- ✓ PVC / Polycarbonate
- ✓ Poplar
- ✓ Obeche

## Applications

- ✓ Cornice & Skirting
- ✓ Door Framing
- ✓ Framing
- ✓ Furniture
- ✓ Shop fitting

Having a great menu to choose from is one thing. Delivering 100% complete and on time against such a large part count is another matter altogether.

A powerful M.R.P. system and an organisational structure that has staff dedicated to order fulfilment ensures outstanding service levels.

We can provide a stock holding service to allow you to have orders delivered from stock on a next day basis.
