

Marine IMO Certification

Newmor's manufacturing facility has "Works Approval Certification" for the production of Fabric Backed Vinyls in accordance with IMO Marine Certification.

This means that all Dixon Turner Fabric Backed wallcoverings can be manufactured to conform to the requirements of IMO marine certification. This enhanced specification would necessitate a modest increase in price, and would normally be available within 10 – 14 days from order.

With regards to the issuing of appropriate certification, it is common practice to submit the attached "Type Approval Certificate" in advance of production, but, as each new batch has to have individual certification, that "Declaration Of Conformity To Type" will follow after the product has been manufactured.
